

Scrap Corruption-ridden Electronic Voting – Now!

Finding: All prominent electronic voting systems in the U.S. (Smartmatic, Sequoia, Diebold, ES&S, Dominion and Hart InterCivic) are networked to the *same* software engine and controlled by the same financiers tied to George Soros and the Queen’s Privy Council, thus making corrupt practices in U.S. elections a foregone conclusion. Lord Mark Malloch-Brown and Sir Geoffrey E. Pattie brag about their ability to “bend” elections, protected by the Queen.

Recommendation: In addition to the companies identified below, there are other companies trying to make voting secure with jpegs, separate validations, etc. on separate machines. However, no tech of any kind can maintain a “bipartisan chain of custody.” The human eye cannot see silicon circuits, software induced voltages, and that which is hidden from empirical observation. We can only ‘trust’ the process and the people. Electronic voting offends the entire concept of our Republic -- which was formed on the concept that authority, being given from the “power of the people” who gain it directly from God, must be separated with jurisdictional boundaries so that the “tendency of men with too much authority to ‘oppress’” can be muted by that separation. Centralizing the voting process so that the ‘Fake News’ can report a sensationalized and profitable result is pure idiocy. We the People should not trust government. We must insist at all times and under all circumstances that dual-Federalism is maintained. The job of the People is to ensure that the boundaries are maintained. We must all be mechanics of the Republic. The following voting machines must be scrapped immediately as the fruit of a poisoned tree called technocracy.
