We call this **Operation: Cat Pounce.**

Objective: To rattle the chains and strike fear and anxiety into the lower-rank membership of the Pilgrims Society. The letter and the recipient have been carefully selected. We are calling on cats around the world to participate in Operation: Cat Pounce, but first I need coverage from the A-team who will mail this envelope as soon as they can. I have already mailed mine.

If one or two of us send this Rotary group a letter, they may dismiss it as incidental. But if a hundred cats do – same letter, same PDF – but from places around the world, they will have to take note. Will they call ^the authorities^ and provide the flash drive as evidence? Will they contact senior members of the PS? Will they be concerned that their names are on the list and that people around the world know that they are part of the PS enemy “ground troops”?

Rotary International is receives funds from the WEF so there will be people very concerned about the letter and contents in the flash drive. The enemy can no longer hide from We the Peeps.

Who can participate? EVERYBODY who gets a copy of **Operation: Cat Pounce** can send a letter. Once you send yours, please encourage your network to do the same. Let’s help the English people expose and defeat their enemy as well as ours.

I was a Rotary scholar from America several decades ago and was hosted by a Rotary Club near Manchester, U.K.

During my visit, an elderly gentleman from the club took me aside to explain the “special relationship” between the United States and the U.K. He told me that America was a commonwealth country of the U.K., but that we aren’t taught this in school. He challenged me to discover the truth about America’s relationship with the monarchy.

Indeed, many decades later I would discover that America is ruled by the British Pilgrims Society and that the ‘special relationship’ is how the British infiltrated American government and military (through Senior Executive Service, SERCO, Qinetiq) to control domestic affairs and how the Pilgrims control the (s)election boxes through Optech software so that Pilgrim candidates always win. The goal of the Pilgrims Society is to annex America back into Britain as first reported in America by Lillian Scott Troy. We also know about First Imperial Press Conference in 1909 and Cecil Rhodes’ 200-year plan for global domination by the British.

Since the elderly gentleman who put me on this hunt is long deceased, I wanted to thank him *postmortem* through the Rotary Club of Great Britain and Ireland for giving me this challenge. Enclosed is an extensive list of the current members of the British Pilgrims Society with some American members named. Our extensive network of colleagues has distributed this list to people around the world so that everyone is aware of the ‘ground troops’ inside the Pilgrims Society - enemy of humanity. You may know these people as they are your neighbors and colleagues.

Have a nice day.
